*Maximum amount applies to each card. All KYB shocks, struts, or complete assemblies. Excludes shipping. Tax not included in rebate amount.

GM Power Steering Whine Noise Tech Tip

Models: 2003-2013 Cadillac Escalade, Chevy Avalanche, Silverado, Suburban, Tahoe, GMC Sierra, Yukon & 2003-2009 Hummer H2

On the above applications, customers may experience a whine noise coming from the power steering pump below 2000 RPMs. It has been found that flushing, then refilling the system with Lucas Power Steering Fluid with Conditioners (Lucas #10442) in many cases reduces, or eliminates the noise. In most applications, 6-8 pints will be required to flush the system. This could be a less expensive alternative for your customers if their power steering system is otherwise working correctly. If the noise persists, and/or there are any other issues in regards to the steering system operation, diagnosis repairs and/or replacement parts will be required to rectify the issue. The 2007 model year and newer trucks, and 2008 H2 have a newly designed pump installed to help improve or eliminate this whine issue.
